

HCV in prisons

Targeting elimination

TUESDAY 24 MAY, 12.00–13.00 BST

In the battle to eliminate HCV as a public health threat by 2030, prison healthcare is at the forefront.

This webinar brings together three international experts who lead prison-based HCV elimination programmes to share their in-depth knowledge and first-hand experience.

Join us and learn how to implement proven HCV elimination strategies in the prison system, get answers to your questions and be inspired by some of the successful programmes that are already driving HCV elimination within European prisons.
